

## GMO Opposition Week

27 nov. – 1<sup>st</sup> Dec 2006, Chiba, Japan

Gualter Baptista and friends

[2:58] Good Afternoon, we belong to "GAIA" and to the "GMO's out the plate Platform".

[3:03] We're part of the dissent voices and of those|who are not represented at this conference.

[3:08] We speak against the GMO's because what was shown a couple minutes ago about cattle forage,  
[3:13] when we consume meat there is no information on the label.

[3:18] On the other side, yesterday was presented a study called "Impossible Coexistence"  
[3:24] that shows we must decide between a country free from GMO's or contaminated with them.

[3:26] I have this report to you..

[3:30] We're not gonna take much more time, just wanna say there are different points of view  
[3:35] from the one presented in this conference which is far from being plural.

[3:38] Are you gonna be in the following discussion? I am not going to stay, I can't.

[3:40] I would like to invite every one... ..You shouldn't have interrupted...

[3:45] I would like to invite every one to the "Joint International GMOOpposition Day".

[3:49] Let the gentleman finish, there's no use in interrupt...

[3:56] So, since this is a week of international |opposition to the GMO's,  
[4:03] next Saturday April, 8th we're gonna have a action against GMO's.

[4:07] For those who would like to be there,  
[4:11] and for those who would like to know more about GMO's and about the other side  
[4:14] which is not shown in this conferences,  
[4:16] we're gonna be in "Praça da Figueira", from 2pm to 6pm,  
[4:22] and it is very important for the ones interested in this questions to show up is this action.

[4:29] It is going to be made in a very peaceful way, through art, information and people's creativity.

[4:37] Only through awareness and knowledge of both sides.. or all sides of this question, can someone  
[4:41] make his options.

We're the ones that make our choices. But one thing| is for sure: Coexistence is not possible.

Thank you.
